 Comments.

- (1) These shipments are reported for the first time, while the other westbound shipments were included in previous reports.
- (2) These aircraft were probably for the Soviet Navy air force.

25X1

25X1

25X1

25X1

25X1

(4)

25X1

- (5) The designation "asse" is used as a code word for uranium ore deliveries to the U.S.S.R. All these shipments were dispatched from the uranium ore mining district in Saxony.
- (6) The report supplements previous information on rail shipments to and from the U.S.S.R. by furnishing additional data [redacted] and the stations of departure and arrival. The data on the eastbound shipments as contained in the present report loses some of its value as no statements are made on the numbers of railroad cars involved. This makes it difficult to identify these shipments which were previously reported. However, it is believed that most of the eastbound shipments were included in previous reports on transportation.
